Presents... Andrzej Wajda's

THE PROMISED LAND (Ziemia Obiecana)

Andrzej Wajda's interpretation of a classic 19th century epic depicts the sweeping change in values ushered in by the industrial revolution. Three friends hope to build a factory, but their plans are quickly jeopardized by local politics and one of the partner's dangerous love affair. Critically acclaimed for its masterful direction and fine acting, this ever-current film has a strong statement to make about modern times. With the master director's brand new re-edit made possible by Poland's liberation from Communism.
